Objective

Aspiring software developer with a Bachelor's degree in Computer Science and Engineering, seeking to leverage strong programming skills, problem-solving abilities, and hands-on experience with software development projects. Eager to contribute to innovative software solutions and gain practical experience in a dynamic technology environment. Committed to continuous learning and collaboration to drive successful project outcomes.

Education

- **Bhagwan Parshuram Institute of technology**   2022-26
  B.Tech CSE
  9.1

- **Guru Gobind Singh Public School**   2020
  Class 12
  95%

Skills

- C, C++, JAVA, SQL, HTML, CSS, JAVASCRIPT, REACT-NATIVE, SQL, React, DSA(Java)

Projects

- **WallPaper App**
  Developed a React Native wallpaper application that allows users to browse and set high-quality wallpapers from an extensive collection. Implemented features such as real-time image search, user-friendly navigation, and efficient image loading. Utilized React Native's cross-platform capabilities to ensure seamless performance across both iOS and Android devices.

- **Weather App**
  Created a weather application using React Native that provides real-time weather updates and forecasts. Integrated APIs to fetch and display current weather conditions, including temperature, humidity, and forecasts. Designed an intuitive user interface for easy navigation and employed local storage to save user preferences and recent searches.

- **Food Delivery App**
  Developed a feature-rich React Native food delivery app with a focus on user-friendly UI/UX. Integrated real-time order tracking, secure payment gateways, and push notifications to enhance user engagement. Implemented backend APIs for seamless restaurant listing, menu browsing, and customer order management. Optimized app performance, resulting in improved load times and user satisfaction.

- **Food Recipe App**
  Created a React Native food recipe app with an intuitive and visually appealing interface. Integrated features like recipe search, ingredient filtering, and step-by-step cooking instructions. Enabled user-generated content, including recipe submissions and reviews. Implemented local storage for offline access to favorite recipes, enhancing user convenience and app usability.
